

## **SP 45.1 *Government Property***

### **Substantive changes made for the 3-23-06 version:**

1. In the definition of “Sensitive Property, deletes a parenthetical phrase stating that sensitive property is “also known as attractive property”. LBNL no longer uses the term “attractive property”.
2. Adds the definition of “Government Property Management System (GPMS)” which came from SP 45.2 which is being deleted.
3. Deletes a bullet from the section on “Special Coordination Requirements...” because we coordinate thoroughly with Property Management when there is government property at any dollar level, not just when it’s in excess of \$500,000.
4. Adds a paragraph about GPMS which came from SP 45.2 which is being deleted, and accordingly adds these requirements in the RESPONSIBILITIES section.
5. Adds the requirement that subcontracts involving GFP/SAP will be marked as such in the PeopleSoft Purchasing system.
6. Corrects the Prime Contract Clause number in the REFERENCES section. It was previously written as I.105, but should have been I.115.
7. Adds Prime Contract Clause I.114(k) to the REFERENCES section.
